

**Product:** Fractalkine (CX3CL1), Human, Recombinant  
**Catalog #:** 11-FRACT-H  
**Amount:** 5 µg

---

**DESCRIPTION:** Recombinant Human Fractalkine, produced in E.Coli is a non-glycosylated, Polypeptide chain containing 76 amino acids and having a molecular mass of 8501 Dalton.  
The rHuFractalkine is purified by proprietary chromatographic techniques. The sequence of the first five N-terminal amino acids was determined and was found to be Gln-His-His-Gly-Val.

**SOURCE:** *Escherichia coli* expression system

**MOLECULAR WEIGHT:** 12.2 kDa

**PURITY:** > 97.0% as determined by:  
(a) Analysis by RP-HPLC.  
(b) Anion-exchange FPLC.  
(c) Analysis by reducing and non-reducing SDS-PAGE Silver Stained gel.

**ENDOTOXIN:** Less than 0.1 ng/µg (IEU/µg) of rHuFractalkine

**DIMERS & AGGREGATES:** Less than 1% as determined by silver-stained SDS-PAGE gel analysis.

**PROTEIN CONTENT:** Protein quantitation was carried out by two independent methods:  
1. UV spectroscopy at 280 nm using the absorbency value of 1.06 as the extinction coefficient for a 0.1% (1mg/ml) solution. This value is calculated by the PC GENE computer analysis program of protein sequences (IntelliGenetics).  
2. Analysis by RP-HPLC, using a standard solution of Fractalkine as a Reference Standard

**FORM:** Purified.

**CONCENTRATION:** 0.1 mg/ml

**STORAGE:** -20°C (aliquot), avoid freezing and thawing cycles

**BIOLOGICAL ACTIVITY:** rHuFractalkine is fully biologically active when compared to standard. The specific activity as determined by its ability to chemoattract human T-Cells using a concentration of 1-10 ng/ml.

This product is sold for laboratory research use or further manufacturing only and should not be used for human therapeutic or diagnostic applications.
