

Product: Anti-FLIP (NT) (Casper, I-FLICE, FLAME-1, CASH, CLARP)
Catalog #: 12-1159
Amount: 25 mg

CATEGORY: Rabbit Polyclonal
DESCRIPTION: FLICE-inhibitory proteins were identified in virus and human and designated v-FLIPs and FLIP respectively. The human FLIP was also cloned by several labs and termed Casper, I-FLICE, FLAME-1, CASH, CLARP and MRIT. FLIP contains two death effector domains (DEDs) and a caspase-like domain. FLIP interacts with adapter protein FADD and caspase-8 and -10, and potentially inhibits apoptosis induced by all known death receptors. Four splice variants of c-FLIPs have been identified and termed FLIP α , β , γ , and δ respectively.

FORM: Purified Ig fraction in PBS containing 0.02% Sodium Azide
IMMUNOGEN: A peptide corresponding to amino acids 2 to 18 of human FLIP. The sequence is identical in all FLIP splice variants.

APPLICATION: Immunoblotting (dilution 1:500)
REACTIVITY/SPECIES: All FLIP splice variants FLIP α , β , γ , and δ respectively.
STORAGE: 2-8°C for immediate use, or at -20°C (aliquot)

12-1159P Blocking peptide available
