

Product: Anti-ICAD (NT)
Catalog #: 12-2001
Amount: 25 mg

CATEGORY:
DESCRIPTION:

Rabbit Polyclonal

A human DNA fragmentation factor (DFF) was identified recently which is cleaved by caspase-3 during apoptosis. Mouse homologue of human DFF was identified as a Dnase inhibitor designated ICAD, for inhibitor of caspase-activated DNase. Upon cleavage of DFF/ICAD, a caspase-activated deoxyribonuclease (CAD) is released and activated and eventually causes the degradation of DNA in the nuclei. Therefore, the cleavage of CAD inhibitor molecule DFF/ICAD, which causes DNase activation and DNA degradation, is the hallmark of apoptotic cell death. Purified IgG in PBS containing 0.02% Sodium Azide
A peptide corresponding to amino acids 2 to 21 of mouse ICAD.
Immunoblotting (min. dilution 1:500)
Human, mouse

FORM:
IMMUNOGEN:
APPLICATION:
REACTIVITY/SPECIES:
RECOMMENDED FOR
POSITIVE CONTROL:
STORAGE:

Murine lung tissue lysate (45 kDa band should be detected)
2-8°C for immediate use, or at -20°C (aliquot)

12-2001-1 Blocking peptide available
